1 Classification Algorithm

1. List all P-type LST bases $T^H \leq 192$
2. Fix external gauge algebras $\prod_i \mathfrak{g}_i, c_L \leq 16$
3. Find all possible sublattice base and store it in the catalog for the specific external combos
4. After completing the catalogs, construct full supergravity lattice by gluing LSTs through the externals

2 All possible combination of external tensors
